

EDWARD SPAAY

Sykesville, USA, [4433400424](#), nebet52@outlook.com, [LinkedIn](#), [GitHub](#)

SUMMARY

Accomplished Senior Engineer with over 20+ years of experience in enterprise infrastructure security architecture and hardening. Proven ability to lead security initiatives, implement hardened baselines aligned with CIS, NIST, and DISA STIG standards, and reduce vulnerability exposure by approximately 30%. Expertise in Active Directory, GPO, vulnerability management with Tenable and ServiceNow integration, and cross-functional collaboration to enhance audit readiness and reduce risk. Eager to leverage extensive security domain knowledge to strengthen infrastructure security at MissionSquare Retirement.

WORK EXPERIENCE

- | | | |
|-------------------|---|----------------------|
| 02/2026 – 03/2026 | Part Time
Independent Security & Compliance | Sykesville MD, USA |
| | <ul style="list-style-type: none">• Maintaining current hands-on work in Active Directory, GPO hardening, vulnerability management, and compliance architecture while targeting enterprise infrastructure security architecture roles. | |
| 01/2016 – 11/2025 | Senior Engineer, Infrastructure Configuration
MissionSquare Retirement | Washington D.C., USA |
| | <ul style="list-style-type: none">• Spearheaded enterprise infrastructure security hardening across 9 technologies, supporting regulated retirement and financial services operations.• Implemented and maintained hardened security baselines aligned with CIS, NIST, and DISA STIG requirements, achieving a 100% compliance posture across assigned technology domains.• Architected and enforced Active Directory and GPO-based security configurations to strengthen domain environments, standardize controls, and minimize security configuration drift.• Reduced vulnerability exposure by approximately 30% through coordinated remediation lifecycle management, risk-based prioritization, and cross-team execution.• Integrated Tenable vulnerability management data with ServiceNow remediation workflows to enhance visibility, accountability, ticket ownership, and remediation tracking.• Collaborated with Enterprise Security, infrastructure engineering, operations, and audit stakeholders to align technical remediation with enterprise risk and compliance objectives.• Improved audit readiness by standardizing security baseline enforcement, remediation reporting, vulnerability status tracking, and repeatable compliance evidence practices.• Provided senior-level infrastructure security expertise across endpoint hardening, vulnerability remediation, configuration management, and enterprise control validation. | |
| 01/1999 – 06/2014 | Senior Engineer
Social Security Administration Headquarters | Woodlawn MD, USA |
| | <ul style="list-style-type: none">• Supported federal-scale infrastructure security across 100,000+ servers, 12 domains, and 19 data centers.• Implemented security baseline hardening aligned with CIS, NIST, and STIG practices across large enterprise server environments. | |

- Directed Microsoft critical alert patch deployments and security remediation efforts, ensuring enterprise risk reduction and operational continuity.
- Contributed to infrastructure security governance, configuration consistency, and enterprise control enforcement across complex federal environments.
- Received SSAAssociate Commissioner Citation in June 2007 for high-impact technical contribution and service excellence.

EDUCATION

04/1986 – 06/1989	Western High School Diploma	Davie FL
-------------------	--------------------------------	----------

SKILLS

Infrastructure Security Architecture	Enterprise OS Hardening
Active Directory Security	Group Policy / GPO Architecture
CIS Benchmarks	NIST Security Controls
DISA STIG Alignment	Vulnerability Management
Tenable	ServiceNow
Endpoint Security	Windows Server Security
macOS Hardening	Security Baseline Engineering
Remediation Governance	Audit Readiness
Risk Reduction	Configuration Management
Cross-Functional Technical Leadership	

LANGUAGES

English (Fluent)
